

SALMAN SHAIKH

UI Frontend Developer | Pune, Maharashtra, India

<https://salm914.github.io/portfolio/>

PROFESSIONAL SUMMARY

UI Front End Development with 5+ years of experience building scalable, high-performance web applications using React, Angular, and Vue.js. Strong expertise in state management, RESTful API integration, and modern UI frameworks. Proven ability to optimize performance, improve user experience, and deliver production-ready solutions in Agile environments.

Key Achievements

- Migrated **Vue 2** applications to **Vue 3** while preserving existing UI, business logic, and user experience, upgraded deprecated npm packages and resolved compatibility issues.
 - Owned QA-stage application with minimal onboarding, reverse-engineered the existing codebase, resolved critical defects within committed ETAs, and delivered production-ready releases.
 - Developed and maintained **RTL (Right-to-Left)** multilingual applications for Arabic users, ensuring accurate layouts, styling, and component behavior.
 - Successfully contributed to parallel React.js and Vue.js projects, demonstrating cross-framework expertise and rapid adaptation to diverse frontend architectures.
-

TECHNICAL SKILLS

Frontend (Primary): React.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux Toolkit, Pinia, Vuex, Context API, REST API Integration (Axios, Fetch API), Ajax, Jquery

Backend (Secondary): Node.js, Express.js, CodeIgniter, PHP

Database: MySQL, Supabase

Cloud: Microsoft Azure (App Services, Azure DevOps, CI/CD Pipelines, Azure Storage)

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Vite, Webpack, Postman, Swagger, Chrome DevTools, Claude Sonnet AI Agent

PROFESSIONAL EXPERIENCE

Software Developer

Aloha Technology Pvt Ltd, Pune

Oct 2021 – Apr 2026

Clients:

Opus IVS, Xpress Bill Pay, CTTA Tow, Castlebranch

- Developed scalable and responsive frontend applications using **React, Vue.js, TypeScript, HTML5, CSS3, Tailwind CSS, and Bootstrap**, improving performance and user experience.
- Built reusable UI components and implemented state management using **Redux, Vuex, and Pinia**, improving code maintainability and reducing development time.
- Integrated **RESTful APIs** using **Axios** and **Fetch**, ensuring efficient and reliable client-server communication.
- Leveraged **GitHub Copilot** and **Claude Sonnet** for code generation, debugging, code reviews, and solution design, accelerating development and improving code quality.
- Took ownership of frontend modules, ensuring timely delivery while mentoring junior developers and promoting frontend best practices.
- Utilized **Git** branching strategies and version control to support collaborative development and smooth production releases.
- Worked in Agile teams, implementing CI/CD pipelines with Azure DevOps and deploying applications to Azure App Services.

Junio Software Developer

(Internship)

Clients:

Tajmeel - Saudi Arabia

IT Asset Pvt Ltd, Pune

Feb 2021 – Oct 2021

- Developed backend modules using PHP and CodeIgniter, creating RESTful APIs and managing MySQL databases.
- Built dynamic and responsive frontend interfaces using Vue.js and React.
- Implemented reusable components and improved UI performance and responsiveness.
- Integrated APIs and enhanced communication between frontend and backend systems.
- Debugged and resolved issues in legacy systems, improving application stability.

EDUCATION

Master of Science (MSc)

Bharati Vidyapeeth University, Pune

2017 – 2019

Bachelor of Computer Applications (BCA)

Dr. Babasaheb Ambedkar Marathwada University

2014 – 2017

CAREER OBJECTIVE

To build scalable frontend platforms, create reusable engineering solutions, contribute to modern frontend architecture, and continuously improve developer productivity and user experience.
